G01 MOBILIZING CITIZENS: WORKING TOGETHER TO AFFECT CHANGE

8:30 a.m.– 9:30 a.m.

Stockholm

Moderator

Mark A. Schoeberl, MPA
American Heart Association

Presenter/Speaker

Principles of Public Advocacy
Ron Pollack
Families USA

Presenter/Speaker

Immigration law
Liliana K Vaamonde, JD
Community Service Society of NY

Working on cross-cutting issues, such as health disparities, requires a very different focus, different people coming together, and new models for success. In order to realize those often talked about principles, individuals, communities and organizations need to learn from real world examples of how these vital forces come together. Examples include developing programs, partnership development among various organizations, etc. In this session, presenters will share their experiences and case studies on how citizens can be mobilized to influence change. Discussions will focus on examples of efforts within their communities of how health disparities topics have been integrated into existing priorities, as well as identifying new ways to eliminate inequities in health.

THURSDAY, MARCH 3, 2005

G02 **THE COLLECTION AND USE OF HEALTH DATA AMONG
ETHNIC AND RACIAL GROUPS BY FEDERAL AND STATE
AGENCIES AND THE PRIVATE SECTOR**

8:30 a.m.– 9:30 a.m.

National Association of Health Data Organizations

Presenter/Speaker

The Use and Collection of Racial and Ethnic Health Data by the Private
Sector

Carl Volpe, Ph.D.

WellPoint Health Networks Inc.

Federal, state, and private agencies currently collect a wealth of information on the health status of U.S. racial and ethnic minority populations. The differences, similarities, and uses of these data collections are rarely highlighted. This session will try to compare the mechanisms by which federal, state, and private agencies collect and use health data from ethnic and racial minority groups.

Presenter/Speaker

Ivan Juzang, M.B.A.

MEE Productions

Invited panelists profile an array of innovative and creative approaches to message positioning to highlight health education and information messages in print and broadcast materials. A special focus of this session will be on reaching diverse populations through the methodical use of media as well as showcasing strategies and approaches to increase the visibility of a program's message in local and regional media. Professionals participating in this session include an Executive from an African American-owned advertising agency and a communication specialist who develops and promotes strategies to encourage the entertainment industry to include health topics in prime-time award-winning television programs. Participants will learn how to examine their own programs to determine if their messages are positioned for optimal exposure.

Presenter/Speaker

Temporal changes in the geographic disparity of heart disease mortality

Michele L. Casper, Ph.D.

Centers for Disease Control and Prevention, National Center for Chronic Disease Prevention and Health Promotion

Each of the projects in this session focuses on the geographic distribution of chronic disease. State Cancer Profiles (SCP), developed by the National Cancer Institute and the Centers for Disease Control and Prevention (CDC), provide a standardized system to characterize cancer burden so that users can quickly explore potential disparities at the national, state, and county levels. Participants will hear about the SCP, what is contained in it, and future plans for a Web site to support its use. Then participants will learn how Geographic Information Systems (GIS) can be used with standardized health and other socioeconomic measurements to provide for uniform and evidence-based measures of health burden. The remaining project was designed to document the temporal changes in geographic disparities of heart disease at the county level from 1992 to 2002 of all U.S. counties. Maps show dramatic changes in the pattern of geographic disparities in heart disease death rates and provide critical insights into understanding the determinants of geographic disparities in heart disease mortality.

Oregon Health & Science University, Center of Excellence in Women's Health

Presenter/Speaker

Using the Perinatal Periods of Risk (PPOR) Approach for Reducing Health Disparities in Feto-Infant Mortality

Jennifer Skala, Med.
CityMatCH, University of Nebraska Medical Center, Department of Pediatrics

This session showcases surveillance methods for improving women and infant health. For example, to evaluate the state of women's overall health, the Report Card uses health status indicators and policy indicators. The states and the nation received grades for each of these indicators. This session will describe the methodology and data sets underlying the Report Card, the major findings of the 2004 Report Card, and the progress, or lack thereof, for key status and policy indicators of interest. The Perinatal Periods of Risk (PPOR) approach is used to identify risk factors, which reduce racial and ethnic disparities in feto-infant mortality. The session will highlight how, from 2000 to 2002, the PPOR approach was used in the Practice Collaborative to build community and analytic "readiness," to map and further investigate city-specific feto-infant mortality, and to translate findings into targeted community-driven actions to address racial and ethnic health disparities. This session will also suggest how urban communities use the PPOR approach to target prevention strategies to reduce feto-infant mortality.

Promoting Exciting Environments in Schools
Tracy Fox, MPH, RD
Food, Nutrition & Policy Consultants, LLC

Presenter/Speaker

Educating California School Board Members: Aligning Policies for Student
Health and Achievement
Vicki Berends
California Project LEAN

This session showcases two projects designed to promote nutrition in schools. The first is a three-year intervention aimed to educate California school board members about the important role school nutrition policies can play to increase the health and academic achievement of students. California Project LEAN, The California School Boards Association, the University of South Florida, the California Parent Teachers Association, and 10 collaboratives worked together to educate school board members with special outreach efforts toward school districts serving low-income children. Participants will learn about the findings from this intervention; the opportunities and barriers for working with local school boards; tools that can help address school nutrition policy; and new partners to address school nutrition policy. The second project describes one state and one tribe nation's experience with the USDA Free Fruit and Vegetable Snack Program. Federal legislation in 2002 and 2004 provided funding to states to implement policies and interventions to provide free fruits and vegetables to school children, including the largest public health initiative, the Free Fruit and Vegetable Snack Program. This session will highlight the exciting program and its impact on students and health disparity issues, as well as ways to expand it through policy initiatives to additional states, schools, and tribal nations.

THURSDAY, MARCH 3, 2005

G07 **HEALTH EQUITY: NEW AND BOLD OPPORTUNITIES TO
ELIMINATE HEALTH DISPARITIES**

8:30 a.m.- 9:30 a.m.

International 9

Centers for Disease Control and Prevention

Presenter/Speaker

Phillip Bowman, Ph.D.

University of Illinois @ Chicago

Presenter/Speaker

Sean Cucchi

Centers for Disease Control and Prevention

Presenter/Speaker

Aida Giachello, PhD

University of Illinois at Chicago, Training and Policy Center

National expert presenters will describe the CDC framework and policies for achieving health equity. Included in this session will be an explanation of both the conceptual and operational definitions of health equity. Participants will recognize why CDC is changing its focus from health disparities to health equity. This presentation will provide an overview of opportunities to collaborate across sectors - federal, state, local, communities, academia, and business. Participants will be encouraged to engage and identify opportunities to achieve health equity and will increase their knowledge of science-based interventions to eliminate health disparities in chronic disease prevention and control.

THURSDAY, MARCH 3, 2005

G08 PATTERNS OF USE AND OUTCOMES OF EVIDENCE-BASED COMPLEMENTARY AND ALTERNATIVE MEDICAL (CAM) THERAPIES AMONG U.S. ETHNIC MINORITY ADULTS

8:30 a.m.– 9:30 a.m.

Rhine/Savoy

Moderator

Osher Institute, Harvard Medical School

Presenter/Speaker

Alarik Arenander, Ph.D.

Maharishi University of Management

Presenter/Speaker

Charles R. Elder, M.D., M.P.H.

Kaiser Permanente Center for Health Research

Complementary Alternative Medical (CAM) therapies continue to grow in popularity and are widely used by patients to treat chronic disorders, in particular to promote cardiovascular health and weight loss. The patterns of use and benefits of CAM in U.S. ethnic minority adults is now being investigated. This session will offer three evidence-based perspectives on CAM use in ethnic minorities, in particular, Hispanics and non-Hispanic blacks and the impact of its use in helping health care professionals offer more culturally sensitive care. The session will provide an introduction to the patterns of use and the outcomes in cardiovascular and weight disorders. Participants will review the results of the Alternative Health Supplement to the 2002 National Health Interview Survey (NHIS). Discussion will focus on the issues surrounding the rate of use and rate of non-disclosure in ethnic minority populations.

CAM therapies have successfully been used to treat cardiovascular disease in non-Hispanic whites, non-Hispanic blacks and native Hawaiian populations. Clinical studies and meta-analyses of a variety of mind-body techniques indicate that meditation, in particular the Transcendental Meditation technique, is a significantly effective intervention reducing psychosocial stress, blood pressure, substance abuse, and mortality rates. The presenters will review the evidence-based support for the use of herbals, acupuncture, meditation, and other CAM modalities in the setting of obesity management. They also will discuss the future directions for research in mind-body health in ethnic minority populations.

Reach 2010 grantees have taken various approaches for addressing chronic diseases in local ethnic racial communities. The presenters will describe methods and opportunities for promoting healthier lifestyles by collaborating with faith-based leadership, pastors, and first ladies, to support system and environmental changes.

THURSDAY, MARCH 3, 2005

G09 LOG IN TO LIVE LONGER

8:30 a.m.– 9:30 a.m.

International C

Moderator

Patricia Brindley

Centers for Disease Control and Prevention

Presenter/Speaker

LaDene Larsen, B.S.N.

Utah Dept of Health

This session will explore the challenges and benefits of using electronic systems to implement cost savings and health promotion interventions. Included will be a description of the cost benefits of Web-based interventions for chronic disease control, appropriate populations for technology-based health promotion interventions, and the technical tools needed to implement Web-based interventions. Panelists will discuss marketing communications strategies that increase the utilization of Web-based information and tools by those most in need.

THURSDAY, MARCH 3, 2005

Presenter/Speaker

Richard Gerber, R.N., M.B.A.

Centers for Disease Control and Prevention, National Center for Chronic Disease Prevention and Health Promotion

The Institute of Medicine's landmark report "Unequal Treatment" provides several recommendations for eliminating health disparities, one of which is the development of a competent workforce to adequately respond to the multidimensional needs of those affected most by disparities. This session will highlight the NCCDPHP Workforce Development and Succession Planning Committee pilot initiative designed to strategically address the workforce capacity and evolutionary needs in the field of public health. The goals of the Committee are to develop the infrastructure, plans and programs needed to:

Develop and retain a diversified workforce reflective of its constituency; ensure a workforce that possesses core competencies for future challenges, goals, and objectives; establish and develop succession plans and an inventory of successors through a number of processes, programs, and strategies (e.g. development, training, mentorship, coaching); work in collaboration with partners to conduct needs assessment, build state capacity, and increase retention; partner with internal/external colleagues and businesses for the purpose of understanding and adopting best and promising practices; and define and effectively address career inertia.

THURSDAY, MARCH 3, 2005

G11 **CALL TO COMPLEMENTARY ACTION FOR FAIRNESS AND
EQUITY IN HEALTH: WHAT SHOULD WE DO BETWEEN
NOW AND NEXT YEAR'S CONFERENCE?**

All session participants will receive, consider and discuss a summary overview of the major topics covered in the partnership track during the conference. They will also consider and describe their own experiences and learning at the conference. The facilitated discussion will identify key areas where partnerships need to be developed, strengthened or connected to establish an effective partnership strategy to address health disparities and equities.

THURSDAY, MARCH 3, 2005

G12 **REPORTING RACIAL AND ETHNIC DISPARITIES IN RISK
FACTORS FOR DISEASE: OPPORTUNITIES FOR PREVENTION**

8:30 a.m.- 9:30 a.m.

International 10

Moderator

Rodolfo Valdez, Ph.D.
CDC\NCCDPHP

Presenter/Speaker

Opportunities for prevention of chronic disease among minorities
Shiriki Kumanyika, Ph.D.
University of Pennsylvania School of Medicine

Health disparities not only refer to the prevalence and incidence of certain diseases but also to the risk factors for these diseases. It is clear that the presence of several risk factors for chronic diseases vary from one racial or ethnic group to another, and these factors are more abundant among minorities. This session will illustrate this excess of risk factors among minorities when compared to the majority population presents an excellent opportunity for the prevention of chronic diseases, as the majority population exemplifies what is achievable.

Health Care Initiatives to Reduce Diabetes Disparities in Rural Settings

Sabrina Harper, M.S.

Centers for Disease Control and Prevention

This presentation will address disparities and the implementation of rural chronic disease collaborative models in order to meet the needs of diverse populations. A panel of presenters, with system change experience addressing disparities in diabetes, cardiovascular (CVD) and asthma within rural health settings, will summarize strategies for implementation of system changes. Each presenter will share what has been done to date, challenges they have faced, systems changes that were necessary to implement the projects and the success of each of the projects.

Presenter/Speaker

Marsha Lillie Blanton, Dr PH

Henry J. Kaiser Family Foundation

Now that the conference is coming to a close, you feel armed with knowledge and ready to take on the world. So, now what? A panel of experts - including Dr. John Ruffin, Director of the National Institutes of Health's National Center on Minority Health and Health Disparities; Dr. Marsha Lillie-Blanton, Vice President of the Henry J. Kaiser Family Foundation; Doug Levy, Director of Communications at the University of California San Francisco School of Medicine; and Dr. Thomas LaVeist, Director of the Morgan-Hopkins Center for Health Disparities Solutions at the Johns Hopkins Bloomberg School of Public Health - will challenge attendees to implement novel methods and programs relevant for their communities and organizations based on information gathered during the conference. Touching on policy recommendations and opportunities on the horizon, the panel will leave attendees with feelings of hope, excitement, and enthusiasm for the future.

THURSDAY, MARCH 3, 2005

CONSEQUENTIAL EPIDEMIOLOGY AWARDS

11:15 a.m.- 11:30 a.m.

Marriott Ballroom

Moderator

Paul Siegel, M.D., M.P.H., F.A.C.P.M.

Centers for Disease Control and Prevention National Center for Chronic
Disease Prevention and Health Promotion

The inaugural Consequential Chronic Disease Epidemiology Awards will be presented to one oral presentation and one poster presentation from the conference. The presentations - chosen by a committee comprised of representatives from CDC, CDD, and PRC - best exemplify the use of epidemiologic methods to enhance the evidence base for chronic disease prevention programs, policy, surveillance, or evaluation. Dr. William Foege, former Director of the Carter Center and CDC, is credited with coining the term "consequential epidemiology" to describe applied research that has the potential to improve public health policy and to prevent disease. Congratulations to this year's winners!

CLOSING REMARKS

11:30 a.m. - 12:00 noon

Marriott Ballroom

Presenter/Speaker

Donna Stroup
